WHERE DIGITAL EXPERIENCE & TECHNOLOGY BECOMES A WEAPON FOR BUSINESS SURVIVAL

We are aware that companies around the globe are facing enormous threats of disruption. We help them face the struggle through Digital Transformation (DX) to ensure THE WAY TO THRIVE, and NOT JUST SURVIVE!

Aibots was successfully established in 2017 at Johor Bahru to harvest innovation into solution. By transforming the culture and building capabilities, we believe that, TOGETHER, we paint our FUTURE.

VISION

To be the number one Director Experience Leader in ASEAN

MISSION

To minimize total cost by designing next generation digital transformation & software solutions in the shortest possible development time

To provide distinctive experience for the customers so that an organization can fulfill their true needs

Along with operational efficiency, it can play an enormous role driving growth and profitability

TRANSFORMATIVE MINDS WITH UNLIMITED EXPERIENCES

Co-Founder

DX CONSULTATION

The Center of Digital Transformation solutions, offering our know-how to your business innovation platform

- ➔ Provide advice & suitable strategy for business needs
- ➔ Help design the system that solves business problems

PROJECT MANAGEMENT OFFICE

Delivering naked-eye quality for on-demand skills & change management with the right vendors

- ➔ Project Manager As-A-Service
- ➔ Provide a project to be delivered
- ➔ Outsource expert team

Automate Human's Repeated Operation

Sources Of Data

Ensure Executives & Managers

boosts company revenue and save operating expenses

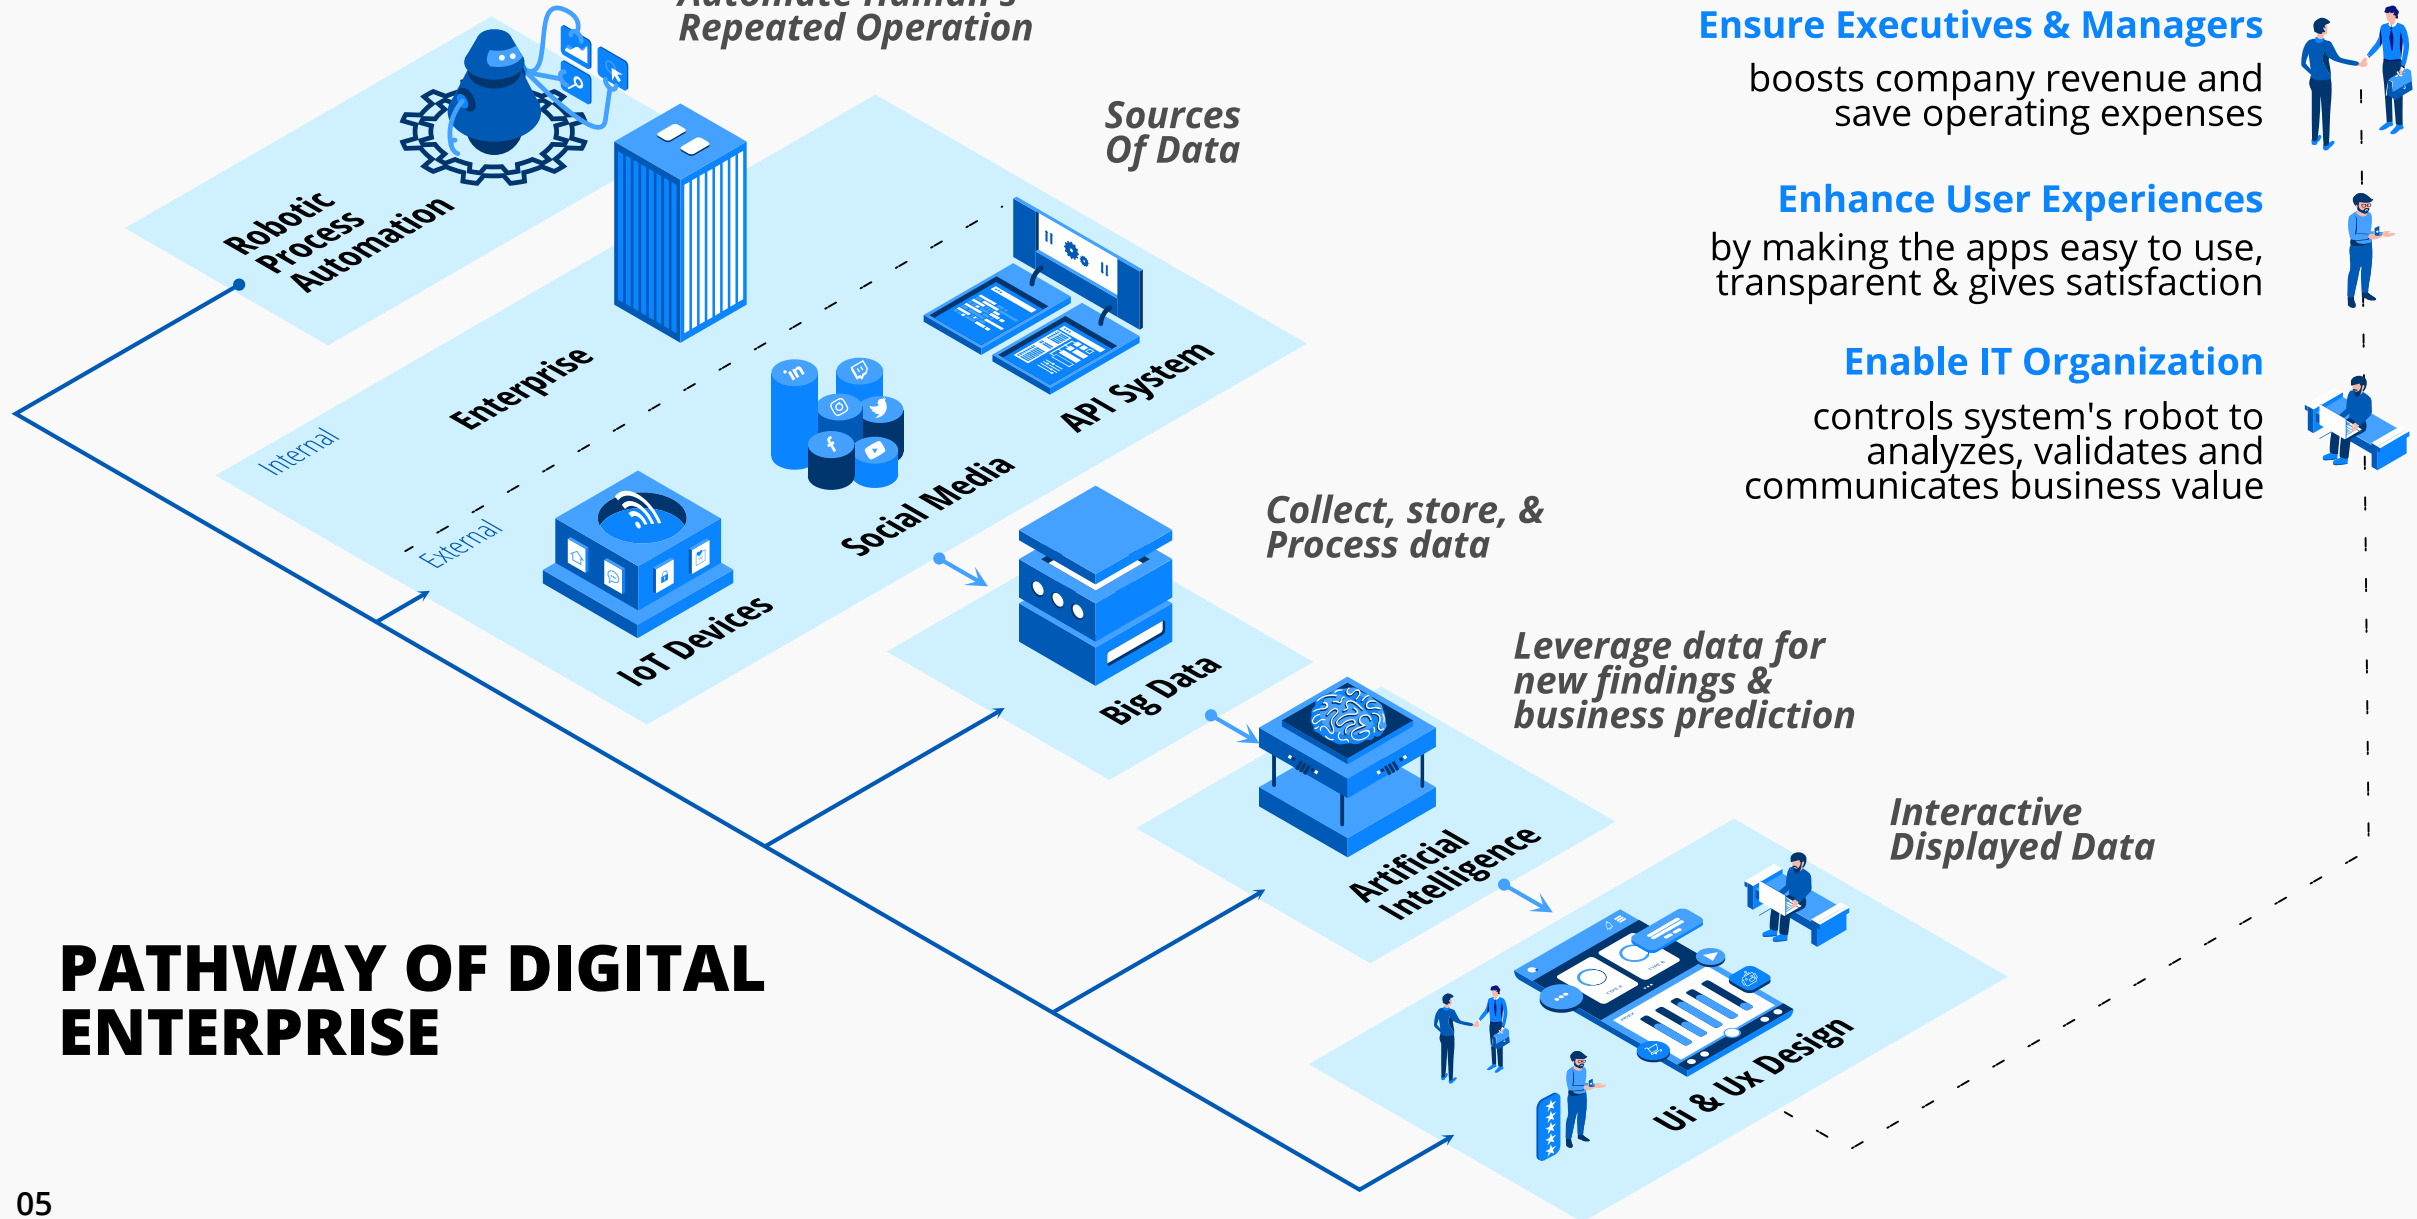

Enhance User Experiences

by making the apps easy to use, transparent & gives satisfaction

Enable IT Organization

controls system's robot to analyzes, validates and communicates business value

PATHWAY OF DIGITAL ENTERPRISE

ROBOTIC PROCESS AUTOMATION

PROBLEM

- Human tends to make errors in the working system
- Cost consumption in hiring multiple labor forces
- Limitation of human such as fatigue and labour working hours

SOLUTION

- Implement a robot application that runs 24/7 non-stop & speed up the working process

INTERNET OF THINGS

PROBLEM

- Lack of visibility in real-time problem-solving
- Human limitations to work with high volume of data & monitoring risky places
- Lack of predictive analytics to identify risks earlier

SOLUTION

- Build IoT sensors' prototype that meets the business requirement, & able to connect to the Big Data

SOCIAL MEDIA ANALYTICS

PROBLEM

- Difficulties in bringing data from social media into the enterprise system
- Varieties of data extracted from social media are too much to be managed alone
- Difficulties in understanding people feedback for sales growth

SOLUTION

- Integrate social media as a part of own enterprise data
- Build analytic automation such as topic tagging & sentiment engine

BIG DATA PLATFORM

PROBLEM

- Lack of system to store a high volume of data & categorize different data types
- Lack of system which has ability to communicate with external resources
- A lot of times taken to analyze the boundless amount & types of data

SOLUTION

- Create a scalable data storage collection platform using elastic cloud
- Create an integration system that connects with external resources or system
- Integrate Ai into the Big Data Platform for better marketing forecasting & prediction

ARTIFICIAL INTELLIGENCE

PROBLEM

- Human capabilities are restricted when processing high volumes of data
- Too slow in deciding business direction when dealing boundless amount and types of data

SOLUTION

- Apply AI to automate humans work process using Machine Learning
- Using unsupervised learning to find new finding, detect anomalies and speed up decision making

UI & UX DESIGN

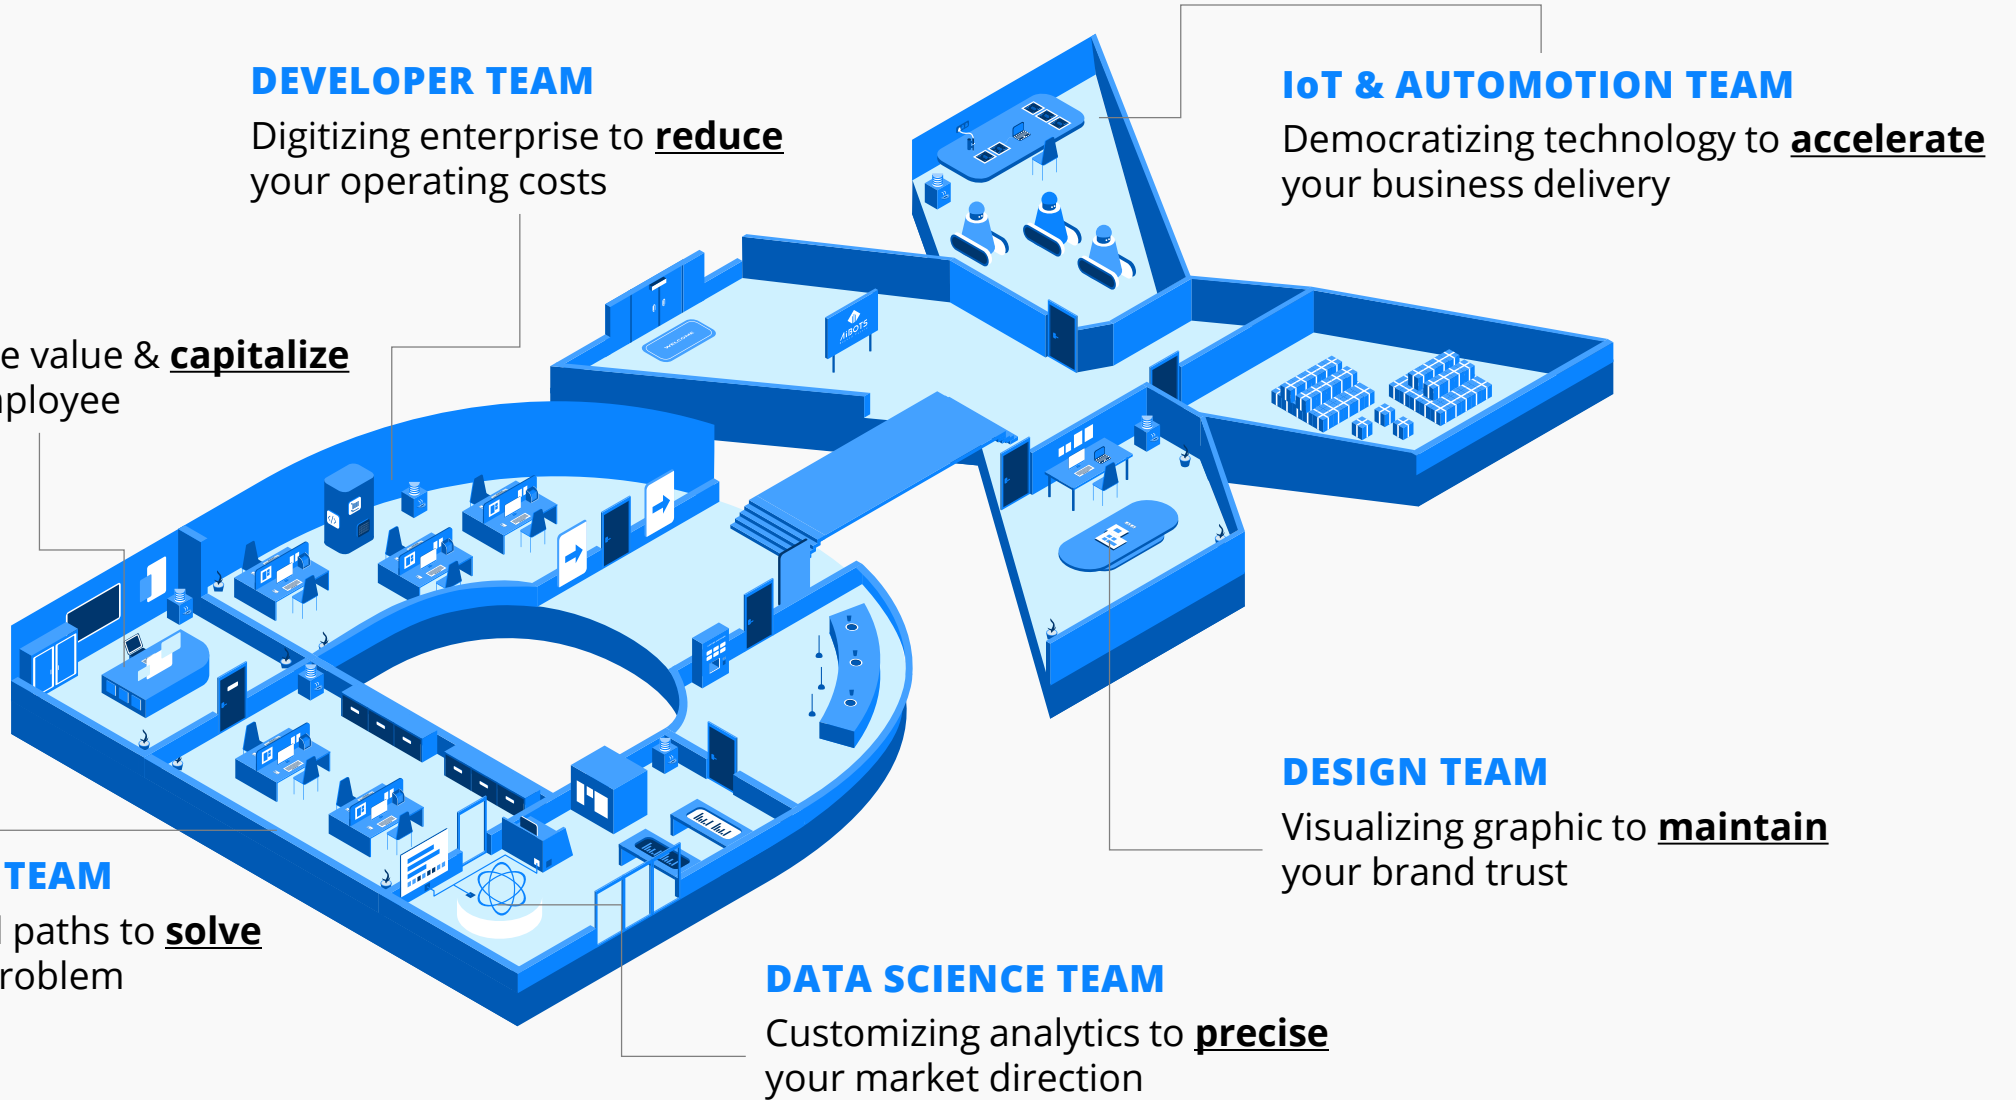

PROBLEM

- Contents produced are not appealing targeted audience to make an interaction
- Bad design & complicated navigation that invite frustration to users
- The unnecessary cost spent & focus on unfavorable users desired product

SOLUTION

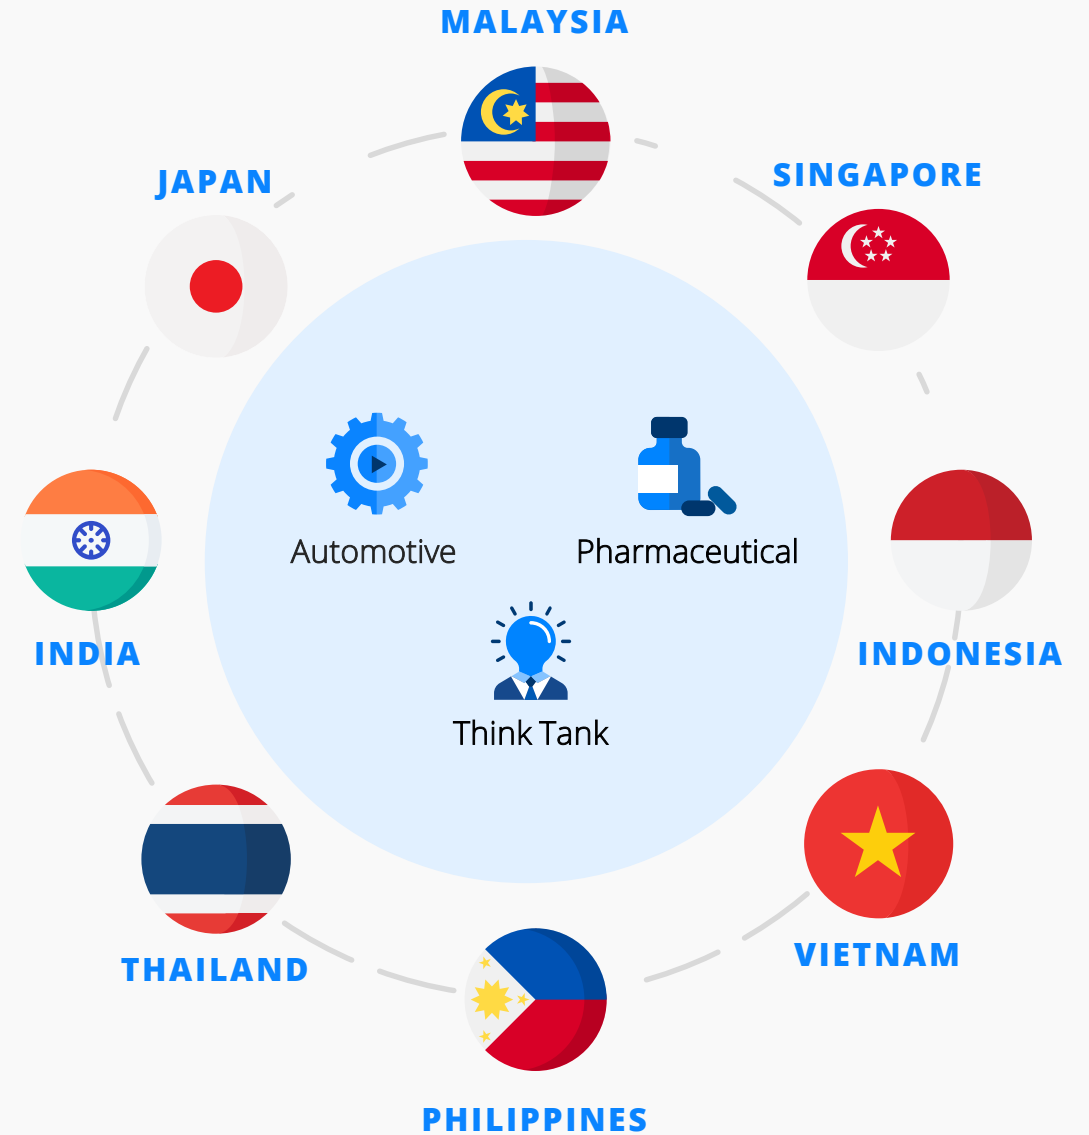

- Apply design that matches business branding & encourage users interaction
- Build an easy-to-use experience that invites users loyalty & recommendation
- Identify users needs & focus on both marketing & sales of profitable product

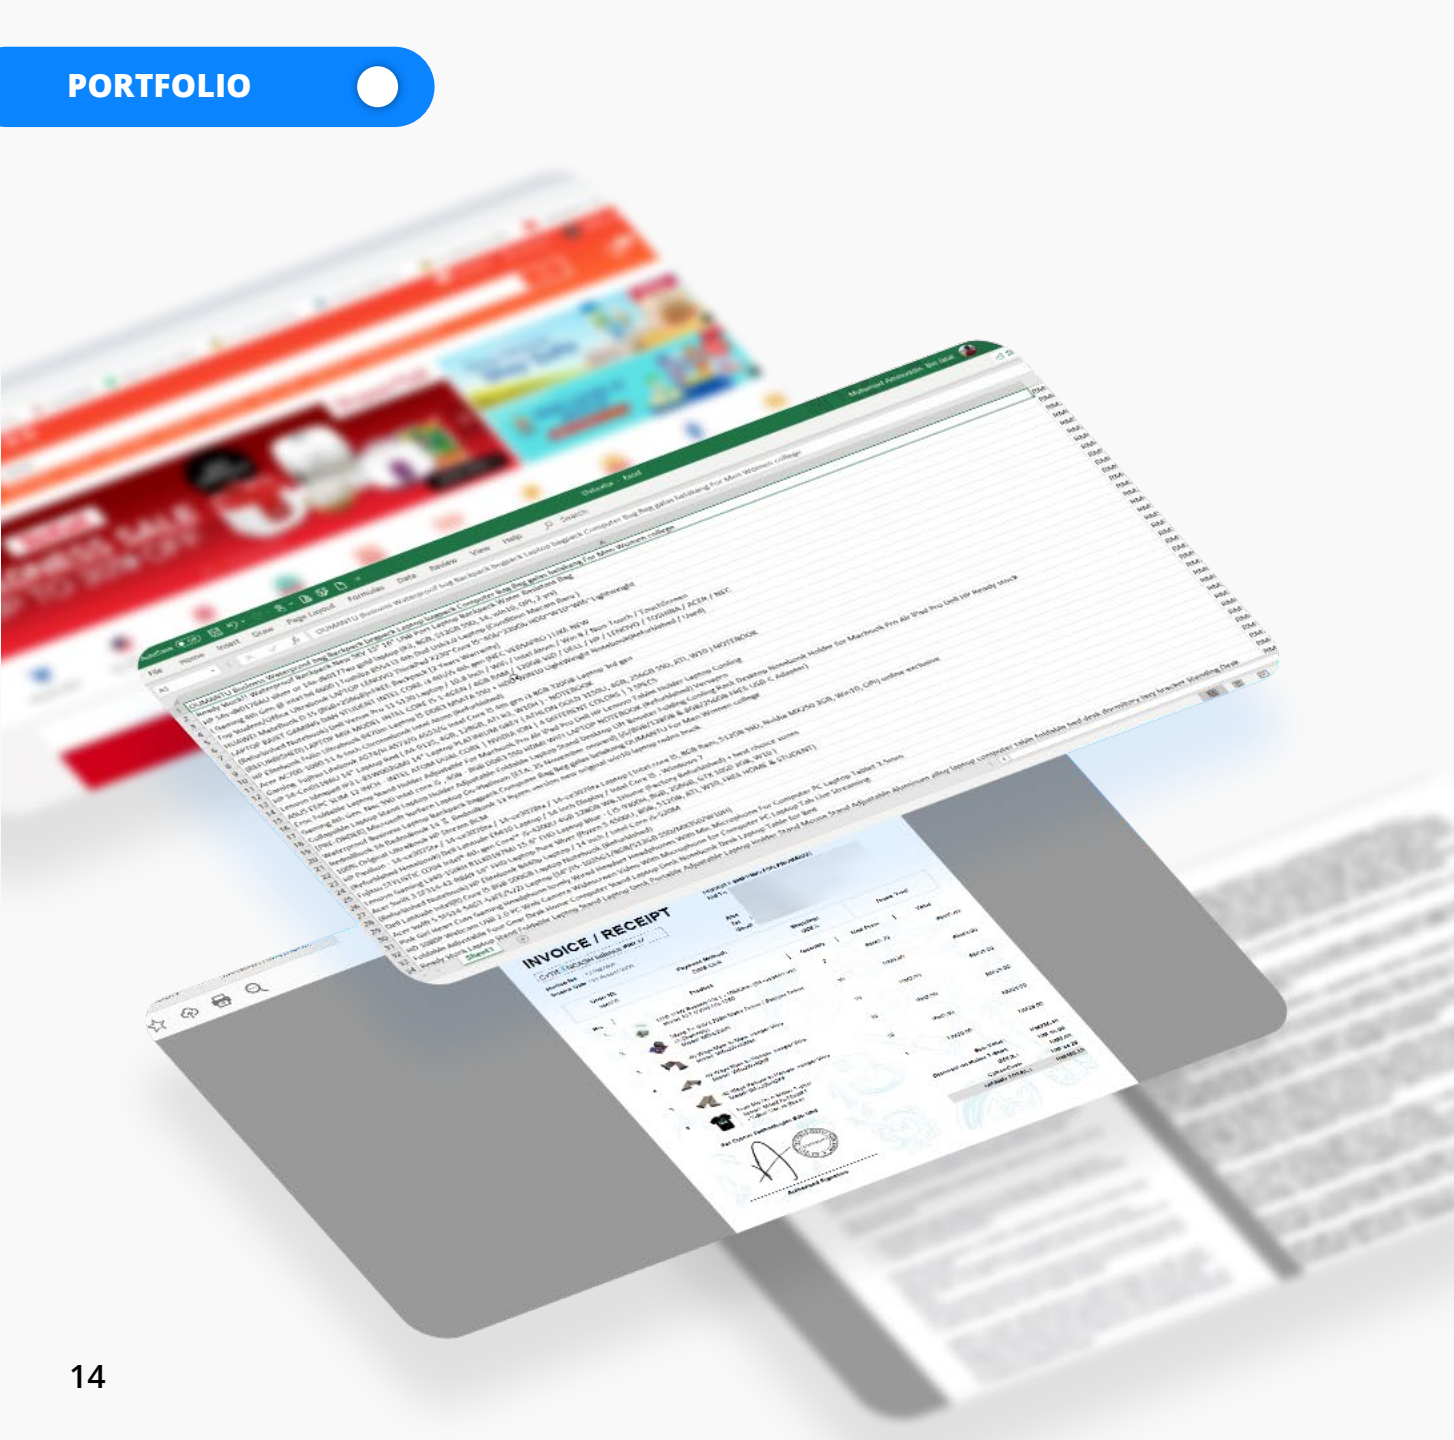

COLLABORATION WITH EXPERTS ON GLOBAL SCALE

An alliance with global experts that brings diversification & strategic collaboration to fulfill the clients need worldwide

REPORTING AUTOMATION

A bot system that helps automate work operation & increase productivity

TARGET USER

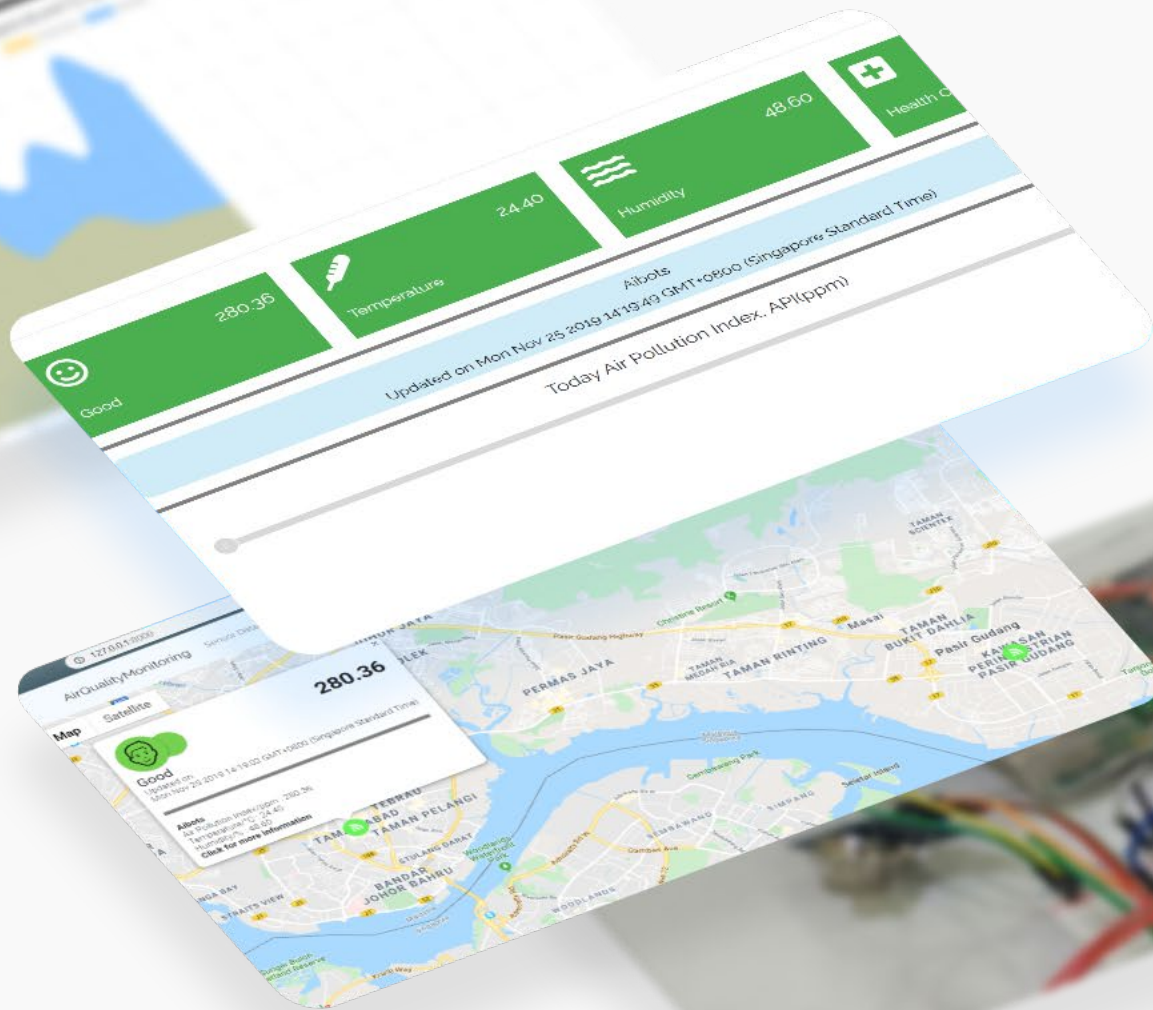

Office Staff

CHALLENGE

- › Lack of manpower to make multiple reports at the same time within short timeframe
- › Staff tends to make mistake when submitting reports
- › Staff can't work on reports 24/7

KEY ANSWER

- › Bot system that eases staff work operation within a single button click without mistake
- › Bot system that runs 24/7 thus helps staff focus on other important projects

AIR POLLUTION SENSOR

A sensor to ease monitoring & tracking air pollution for certain or targeted places

TARGET PLACES

School

Factory

CHALLENGE

- › Difficulty of traveling to the spot to acquire data
- › Exposed to poisonous & risky environment
- › Cannot get real-time data accurately

KEY ANSWER

- › User can access system that has real-time monitoring
- › User only need to monitor air pollution easily using computer & mobile

OFFICE FACIAL RECOGNITION

AI-based system that helps recognize office staffs

TARGET USER

Office Staff

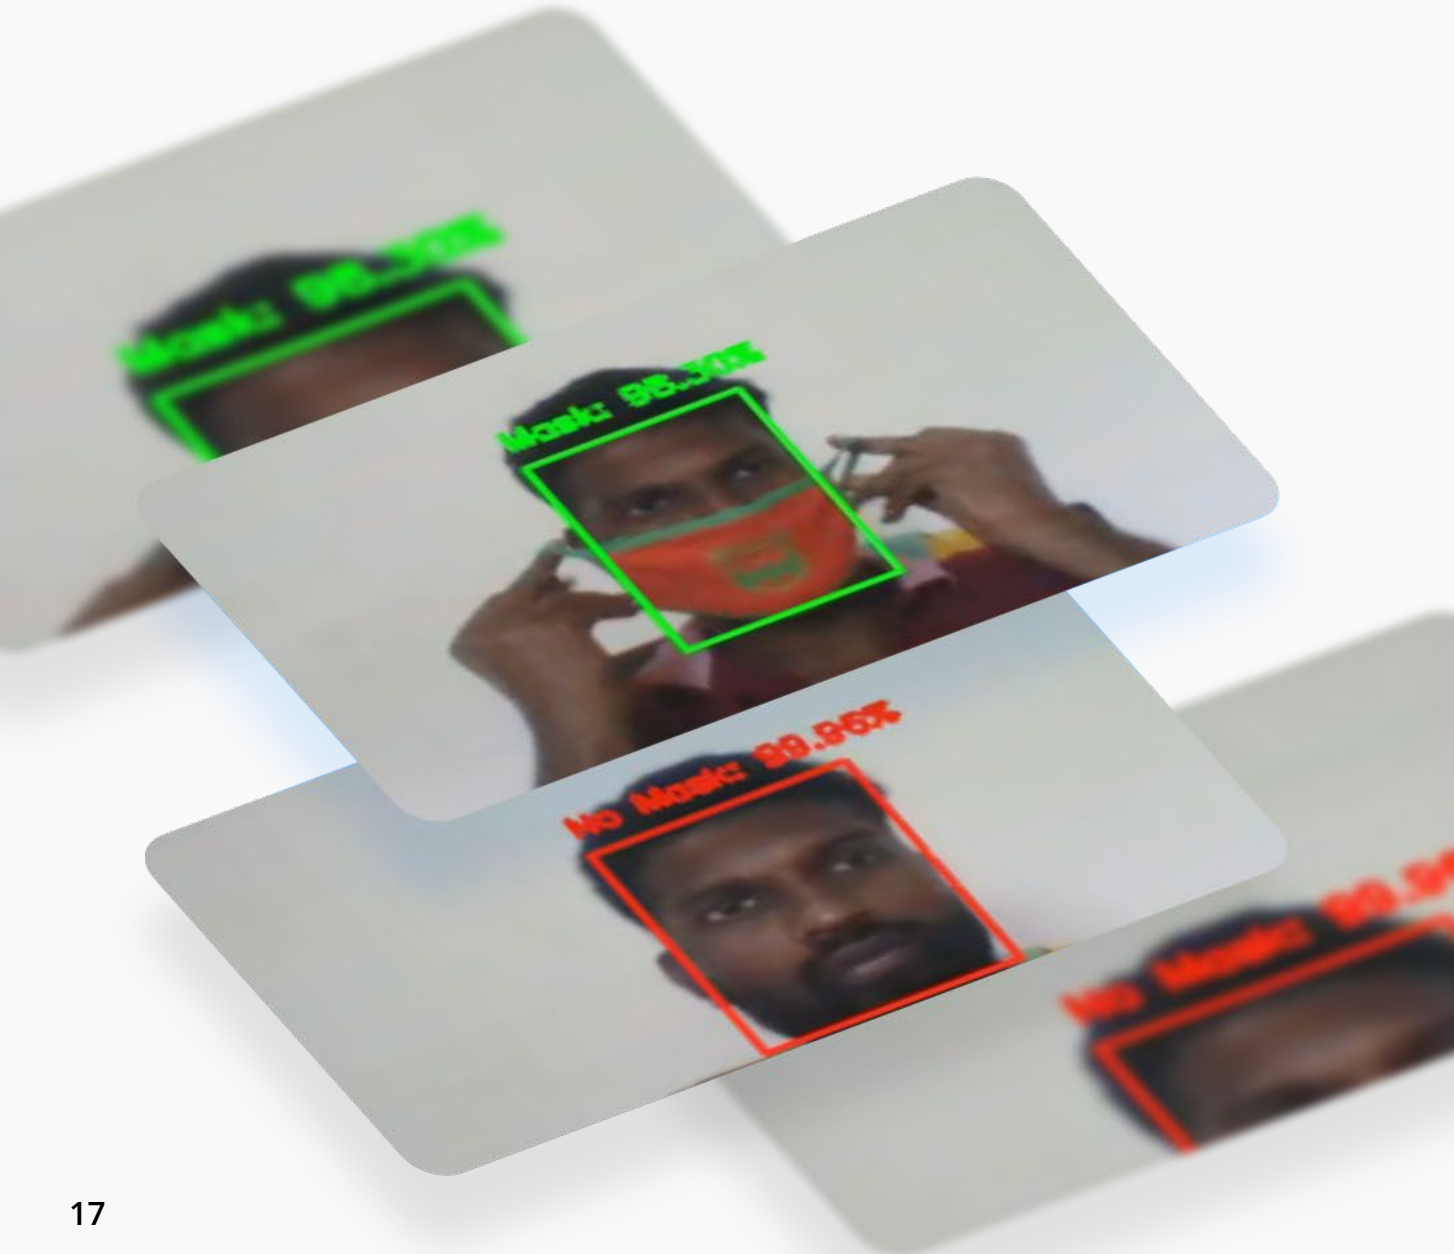

Factory Labour

CHALLENGE

- › Staffs need to scan card & run fingerprints to inform staffs attendance
- › HR Department need to collect & store staff attendances manually into document
- › Can't detect stranger if there are breaches

KEY ANSWER

- › AI recognize official staffs & maximise security from unknown people
- › AI helps staffs enter the office quicker & fill in staffs attendance data

PUBLIC FACIAL RECOGNITION

AI-based system that recognize people who wears / don't wears mask especially during pandemic

TARGET PLACES

Shopping Mall

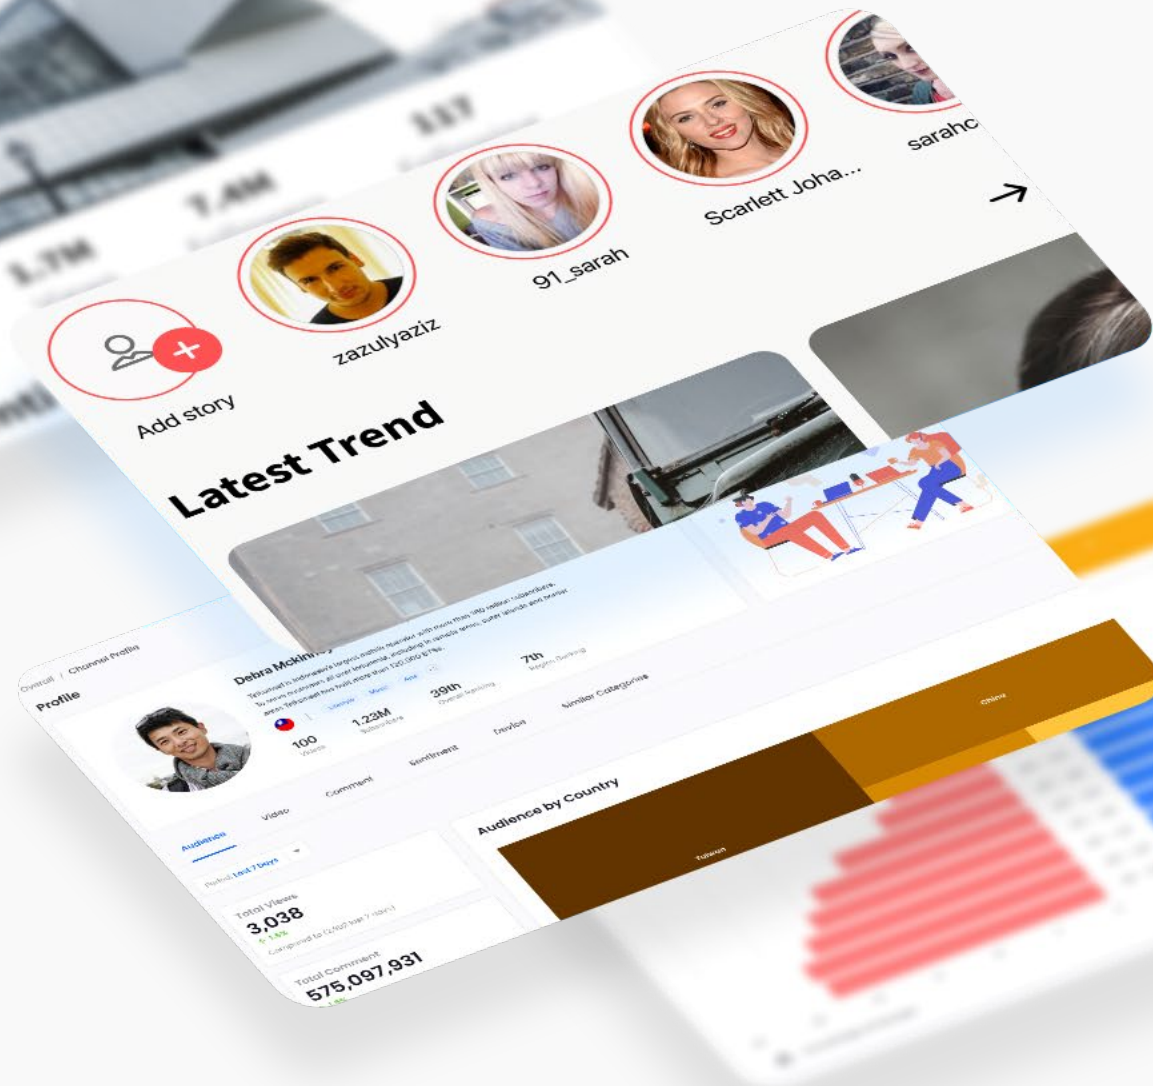

Public Environment

CHALLENGE

- › Lack of manpower which are responsible to monitor incoming people on the spot
- › High-cost product to track people temperature & who wears mask at the same time

KEY ANSWER

- › AI helps to give information of the people who doesn't follow the safety rules in public places
- › AI with thermal body sensor based system can give notification of the people that endanger others

SOCIAL MEDIA & ANALYTICS APP

An application that works commercially and has its own analytic system

TARGET USER

Business
Owner

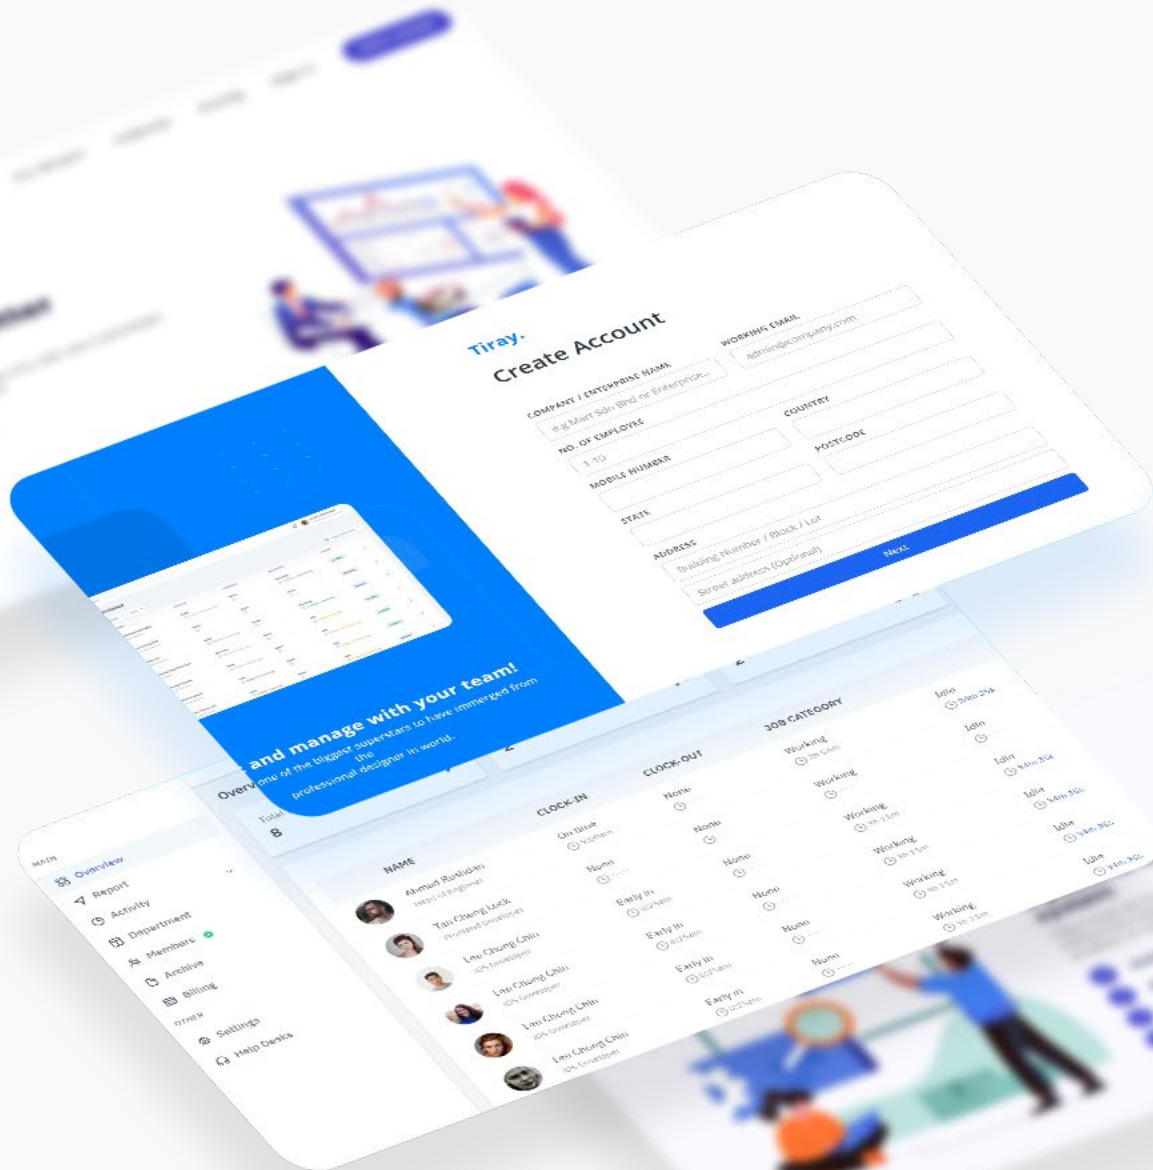

Influencer

CHALLENGE

- › Inefficiency of data analytics management across countries
- › Low rates of mobile user experience
- › Less track of key performance by each of the influencers

KEY ANSWER

- › Increase the engagement rate of application
- › Better in customer experiences & usability
- › Up to date visual design appearance

TIRAY

An app to monitor & track office labour activity during office or work hours

TARGET USER

Office Staff

Freelancers

CHALLENGE

- › Insecure when staffs or freelancer work remotely
- › Difficulties in finding the right time to hold a meeting
- › Difficulties in judging staff performance & productivity fairly

KEY ANSWER

- › Tiray helps monitor & track activities of staff & freelancer efficiently during office hours
- › Tiray informs HR Department the availability of staffs & freelancer during office hours
- › Tiray displays data of performing staffs in easy to understand chart
